

Three and four year old children inhabit a wonderful world filled with imagination and discovery. At Redeemer Lutheran School our goal is that every child in our care develops a love of learning in a safe and caring environment. We are committed to providing your young learner with an early childhood education that builds a strong foundation for future success in Kindergarten and beyond. A three tiered program is offered to meet the needs of your family.

Preschool Class - The 3 year old class focuses on learning through play with an emphasis on language development and math readiness. Students will also learn many important social skills such as learning to play and share with others. Students will develop a close relationship with God, so they will come to realize the God is a source of love, comfort and friendship.

Pre-Kindergarten Class - The 4 year old class focuses on learning all the skills necessary to be a successful student. Academics include reading readiness, math, science and social studies. Social development will include learning to stay seated, raise their hands and take turns speaking and listening. Students will also be introduced to the Bible and participate in silent and group prayer.

Stay & Grow - The Stay & Grow class is an enrichment class for both preschool and pre-kindergarten students. This program reinforces concepts that are being taught in the classroom as well as activities that include creative play, art, music and religion. Lunch and naptime are also a part of this program.
